

## Mobile File Sharing - Enterprise Package

Securely access, create, edit and share content, anytime, anywhere

### Cloud Deployment Options

Private Cloud – On-Premise	Offers the greatest IT control and security to regulated or security-conscious organizations. Deploy on-premise in VMware, Citrix XenServer, or Microsoft Hyper-V virtualized environments within the DMZ.
Private Cloud – Accellion Hosted	Leverage Accellion hosting expertise and resources, while retaining full administrative capabilities.
Private Cloud – Hybrid	Combine on-premise and Accellion hosting to balance compliance and privacy with hardware management and administration skills – ideal for large multinational or distributed organizations.

### Mobile Enablement

#### Mobile File Sharing

Mobile Apps	Native mobile apps for iOS, Android, Windows, and Blackberry devices.
Highly Secure	Files accessed via Accellion mobile apps are fully encrypted and never leave the Accellion “container.” Accellion Admin can limit which apps can be used to open files. System logs all file sharing and collaboration actions, even when sharing with external recipients.
Rich Native File Support	Securely browse, create, edit, view, send, and share files of any type or size – not limited by device storage capacity. Images and video can be uploaded directly from the camera or Camera Roll to workspaces.

#### Mobile Collaboration

User-Administered Workspaces	Easily create collaborative folders to share files with internal and external users. Authorized users can upload new versions of files or create new documents; files can be locked to limit editing.
Easy, Secure, User Log In	Internal users login using LDAP/AD, external users are auto-provisioned by the Accellion server.
Granular Access Control	Multiple user roles: Manager; Contributor; Uploader; Viewer – offer differing levels of authority.

#### Mobile Device Management

Remote Wipe	Admin-initiated delete of content stored within Accellion mobile app on lost or de-provisioned devices.
3 <sup>rd</sup> Party MDM Support	Integration with MDM solutions from Good, MobileIron, and Symantec.

### Online File Sharing

#### Secure File Transfer

Large File Support	Send files and folders of any size to internal or external recipients via secure links.
Send From Familiar Desktop Applications	Plug-ins for Microsoft Outlook, Lotus Notes, and Autonomy iManage.
Secure, Auditable File Sharing	Comprehensive file tracking and reporting on every file shared.

#### Online Collaboration

Secure Team Workspaces	Share and manage documents of any type with internal and external users.
Effective Cross-organizational collaboration	Organize, view, upload, download, comment, lock/unlock, synchronize, and share files and versions.

#### File Sync

Desktop Synchronization	Synchronize files of any type between desktops and the Accellion cloud.
-------------------------	---

#### Role-based Access

Role Management	Set up and define access controls based on user roles.
-----------------	--

#### File Version Control

Lock / Unlock Files	Maintain version control with ability to lock and unlock files for editing. Maintain multiple file versions.
---------------------	--

### Enterprise IT & Security

Encrypted File Storage and Transfer	128- or 256-bit AES encryption on all content, in transit and at rest.
Anti-virus Scanning*	Integrated malware scanning of all files uploaded and downloaded.
Reporting and Audit Trail	Comprehensive file tracking, audit and reporting capabilities to demonstrate compliance with SOX, GLBA, HIPAA, FDA, and other compliance regulations.
IT Admin Console	Rich Admin interface provides granular control over hundreds of individual system settings.
Custom Branding	Large or multinational organizations can present branded UI to divisions, partners or other groups.

## Enterprise Plug-ins

### Microsoft Plug-ins

#### Outlook Plug-in

Overcome native Outlook or IT limitations and send very large files via Accellion to email recipients, without leaving Outlook. IT can set controls and filters e.g. automatically strip large files only and substitute with a link in the message body; automatically expire attachments; etc.

### HP (Autonomy) iManage Plug-in\*

#### Secure, Auditable File Sharing For Legal

Quickly and securely share documents, scans, videos and other legal assets with outside counsel, clients and other recipients – without leaving iManage WorkSite or DeskSite UI.

## Enterprise Integration

### LDAP/AD Support

Supports corporate LDAP and Active Directory configurations.

### Single Sign-on (SSO) Support

Log in to Accellion via corporate SAML- or Kerberos-based SSO credentialing system.

### Automation Agents and API

Enables third parties to automate file transfers and implement file transfer rules. Easy to use APIs are accessible over SSL, in any web-aware programming language on any platform.

### DLP Integration\*

Supports DLP solutions from Symantec, RSA, Fidelis, Palisades, and Code Green Networks.

## Mobile Productivity

### Mobile Document Creation and Editing\*

#### Rich MS Office Compatible Editor

Create or edit MS Excel, Word, and PowerPoint files on iOS and Android devices.

#### Tight Integration with Back-end Systems

Edit files stored in Accellion workspaces, SharePoint or Windows File Shares. Offline editing support.

### PDF Annotation\*

#### Rich Annotation & Markup Tools

Highlight text; insert comments; draw shapes and freehand; add digital signature; full text search on content and annotations. Annotate while online or offline.

### Mobile Printing

#### Secure Mobile Printing

Securely print from iOS or Android devices to any connected corporate printer, without using a VPN.

#### Fully Integrated

Fully containerized printing minimizes risk of data leaks. Automatically connects user based on LDAP credentials – no separate login required

\*Optional add-ons available at extra cost

Note: Installation, Support and Training fees may apply – Please speak with an Accellion Sales Representative for details
